The image displays a 3x3 grid of photographs. The top-left cell shows a brown and black dog lying on green grass. The center cell shows a German Shepherd running in a field. The remaining six cells show a silhouette of a dog sitting on a dark horizon against a deep blue night sky filled with stars and a large, bright full moon.

this game is just amazing! fun with friends, Customising levels is fun and generally just a good time in general, generally. but it does take a little bit of time to figure the game out if your stupid like me (took me 8 hours of playtime to find the axe). sign of good things to come from the developer. i cant actually figure out how to install the pack to use it... Nice beats and good puzzles. Fun !. The Puzzle Room is another one of the good ones, and judging from the menu there's more coming in addition to the two rooms the game already has. There's a lot of things to play with, hats to wear, things to paint on, and puzzles to solve, and that makes this one feel unique; not everything in these rooms are related to the puzzles, some things are just there to let you wind down and spray paint the walls or put on a Vader helmet and swing around a lightsaber for the fun of it. The second room may or may not have a problem because one of the keys on the computer's keyboard doesn't work for me that may be required for the answer, but otherwise this is a firm contender for "one of the good ones" in the Escape Room VR category.

This is it. This takes the cake. This is the worst Steam game I have ever had the misfortune to play. Due to psychological trauma am I not able to recount the events at this time. Please. Do NOT buy. This is not even funny bad. It is just boring and unplayable.. platformer at a low price, like all. fun for the first round then after that its all kind of played out. animations are just a little off. Good game but this dlc just feels off point.. The artwork during the cutscenes is really nice.

Worst Painkiller game ever made.

3V10. overall its ok, not very long and pretty generic and fairly easy to predicte. but semi interesting topic. I love this game. The Single player is a blast! I feel it reminds me of total war with the turn-based system. Your goal is to capture certain facilities on the map that bring in certain resources or other support needs. (Spare parts, fuel, ammo, airbase, radar, etc.) except much more simplified and obviously in a different universe with tanks, aircraft and infantry!

The Single player USA campaign is awesome! Going from battlefield to battlefield conquering the airbases, fuel depots, radar stations and defending them is fun.

The unit variety is quit nice also that makes the game more interesting- MBT-70, Abrams, M60, all sorts of anti-tank missile vehicles, its just awesome to see how they work, have proper armor values and realstic armor system on all the vehicles.

Its 5 dollars! A great deal for a game you will get 20-40 hours of out in just one campaign!

Great game, I wish the multiplayer had co-op campaign and the multiplayer to be functional as doing it over virtual netowrking is pretty laggy and boring.

The graphics are also not fantastic, but if you have played blitzkrieg or honestly don't care, it works for anyone.

Great game for any RTS/RTT gamer!. Install > Play > Exit Game > Uninstall

The quickest way to farm Steam achievements! Only purchase this game for achievements! Does not have any real gameplay!
